MAGIC EFFICENCY OF OUR 100% NATURAL INGREDIENTS

THE ROYAL JELLY

We use extensively very high concentrations of this of Nature's unique amazing miracle & wonder. Produced by bees to feed their queen and royal larva. Only because of intake of royal jelly the queen can live 500 times longer, produce 1500-2000 eggs/day and has double the size of the working bees who lives about 5-6 weeks and remain sterile. Up till now science could not discover all its secrets and composition. It provides your organism, beauty, health & well being with incomparable, safe and purest, most powerful and wonderful natural concentrated sources of all its needs. By getting Vitamins, minerals, trace elements, enzymes, active substances etc. this can change very favorably your life and provide with special new vital force, well being, etc. Try and see.

[PDF](#)

Composition of ROYAL JELLY

It contain all the vitamins A, B1, B2, B6, B12, H, F, PP, C, D, E, K, folic acid, pentatonic acid. Also it contain proteins and more than 16 amino acids like cystine, lysine, theronine, phynalalnine, isoleucine, etc, and mineral and trace elements as Potassium, Sodium, Phosphor, Magnesium, Manganese, iron, Calcium, Siliceous, Cupper, etc. enzymes, active substances and a proportion of unknown highly active non identifiable substances or molecular complexes called also the mysterious factor R and pollen.

Action: Because of its very high concentration in active and noble healthy substances the royal jelly can be considered as regenerating, aphorizing, stimulating, tonifying, revitalizing and re-equilibrating and harmonizing agent. Highly indicated to enforce the organism against psychical, pathological and physical aggressions of the environment and to obtain the maximum physical and intellectual potential out put. Help the organism against fatigue, l'asthenia, tension, hypertension, hypotension, memory troubles and

anxiety. Excellent appetite moderation and regularization that is highly indicated in both anorexia and bulimia. Also highly beneficial effect for sexual performance optimization and stimulation as well of reproductive system. Highly effective for the skin and hair treatment and preservation from premature aging.

The researchers, Doctor Butant and Dr. Townsend discovered the important reduction action of the Royal jelly against cancer. Doctor YOSHINOBU TOCUDA proved the highly beneficial effect of the royal jelly on central nervous system and its effect to retard the human aging process.

A big number of clinical tests proved that the intake of royal jelly prolong ate life span and retard the aging and organism decline.

Doctor MASAYOSHI MAZDA, member of association of Japanese apiculture as well other doctors in Europe like Dr. Donoadieu who conducted serious and long researches programs could define the properties and **effect of royal jelly** as below:

1. Stimulate the metabolism and appetite regularization.
- 2° Favorites sleeping, good humor and relaxation.
- 3° Combat la constipation.
- 4° Improve blood circulation and health.
- 5° Increase the muscular capacity and reduce much the fatigue.
- 6° Stimulate sexual functions.
- 7° Retard and aging and improve life of aging persons.
- 8° It preserve skin and hair youth and aspects.
- 9° Have highly beneficial incidents in case of Diabetics, tension, gastric and intestine and Asthma. etc....

THE HONEY

Produced by the bees from the living flowers nectar. To produce one kilo of real pure flower Honey the bees needs to make **10 million visits and cut a distance of 260'000 kilometer (6.5 times of earth circumference)**.During the 6 weeks of life span of bee it covers 850 kilometer to produce 5 gram of honey. Thus it brings to our organism highly nutritive and noble energetic and highly protective substances

PDF

Composition : Vitamins B ,B ,B ,B , PP,C,D, Pollen, Aromatic substances, Antibiotics and digestives Enzymes, simple sugars (mostly directly assimilables by the organism), Minerals trace elements like Potassium, Sodium, Calcium, Manganese, Cupper, Phosphorus, Sulfur

Action: Indicated to help the organism against the throat irritation, coughing, bronchitis, sinusitis, urinary troubles, spleen and stomach protection .With certain oils and natural ingredients it can be highly efficient against burns, wounds, scares, irritiations,etc.

BEE WAX

Produced by the bee glands and contains a lot of elements collected from plants. Used for emollient and highly beneficial effects.

PDF

Composition: Pro-Vitamin A, fatty acids, Céroléine, different aromatic substances and plants pigments, colorants, bactériostatic and other non identifiable vegetal elements

Action: Due to its complex composition and emollient, cicatrizing and anti-inflammatory action it had been used since the antiquity for wound treatment, wound disinfection and skin treatment and as a recipient in pharmacology.

FLOWER POLLEN

Produced by flowers and harvested by bees to feed bees and their larva. Due to the exceptional richness in a great number of Biological highly active substances it is used to prevent and maintain the organism and provide it with noble and highly efficient energetic and preventive elements.

PDF

Composition: Protides; 20 amino acids such as Glutamine, Lysine, Histidine, Cystine, Methionine, Valine, Theronine etc., Vitamin en in a highly appreciable quantities such as A, B1 B2, B5, B6, B7, B9, B10, PP, H, C, D, E etc., pro-vit. A, Minerals and trace -elements, like Potassium, Magnesium, Phosphorus, Calcium, Siliceous, Manganese, Sulfur, Cupper, Iron, Chlore etc., Glucides specially simple sugars ,lipids, Enzymes like Phosphates, Amylase, Invertase", about more than 50 active substances and other still non identifiabile.

Action:

Due to its extreme richness in necessary elements it supply the organism with all its needs of nutritive and energetic natural elements to re-establish any metabolic deficiency. Pollen can be considered as a regulating, regenerating, re-equilibrating of general metabolism and intestinal functions. Highly profitable for diabetics, nervosas, depressions, neurasthenia, and fatigue, Asthenia et sexual impotence anorexia, convalescence, slimming rachitic, growth delay, bad teething, arterioscleroses, capillary and vascular fragility, anemia, prostates, teeth decay and hair loss and certain skin problems . Memory trouble, sleeping problems and vision fatigue.

THE PROPOLIS

Guardian of the beehive this resinous waxy material is elaborated by a specialized group from the flower and tree buds .It use to protect the hives from external aggressions and as cement. The 50'000 bees of the hives produce only 20- 30 gram of propolis during the whole year. This very precious complex had been used since the antiquity and studied by scientists around the world who could isolate until now more than 170 complex substances that can maintain and protect and maintain good health and pure skin. Extremely powerful against all kinds of micro-organisms (bacteria, virus, parasites, etc)

PDF

Composition: Among the complex components of its sophisticated structure ; resins, Flavones Chrisine, Tecto-Chrisine, Galagine, Isolapine, Ramnocytrine, Pinocébrine etc.), Betulénol, Isovanilline, aromatic unsaturated acids,waxes,pollen, (B , PP ,Pro-Vitamins A,E,P), Minerals and trace-elements (Chlor, Potassium, Sodium, Magnesium, Iron, Aluminum, Silica, Zinc etc.),a big number of aromatic and non identifiable active biological substances..

Action

The huge number of highly active natural-biological elements that were elaborated by the bees from plants makes the PROPOLIS highly beneficial for a wild variety of application such as: Antibacterial, Antiviral, Antiseptic, Antiphlastic, Antifungal, and Anticoagulant and Cicatrizing. Highly useful for Dermatomes and Dermatitis, respiratory and gastric tracks affections as well as for the prostates system. This substance had been used since the ancient times for a big variety of applications

**Our other raw material exclusively from
Nature and plants serving your health**

This small guide information is destined to give you a snap shot on the needs for vitamins, mineral as well as natural products. This will contribute knowing better the nature that is around us and with whom we should always search to live in harmony to protect our future, health, well-being and the environment itself.

The indications given herewith are the result of experience during many centuries and basing on a big number of references. Nature is full with unimaginable treasures to maintain our health.

In medicine, the symptoms are the witness of a functional disharmony which can disappear if we act favorably on the real causes of these symptoms. Most of the time the cause is external (trauma, intoxication, microbes, etc.). This can produce a direct action on the organs and lead to disruption in the functions of these organs. The other main reasons are internal, such as psychological, emotional, genetical, etc.

Thus knowing well yourself physically and psychologically and acting with a good sense can be the first elementary rule of good hygiene.

Basing on a human knowledge and modern science, PBN tried to resume for you the effects and the benefits of each vitamin and mineral that is necessary for your health, beauty and well-being.

Minerals and trace-elements catalysors

- Aluminum** : In case of atonia, sleeping regulation and in case of intellectual and mental retardation of children.
- Arsenic** : Tonic, Reconstituant, appetite and respiration stimulant and active against dermatomes.
- Bore** : Intervene in the phosphorus equilibrium, helps for good sleeping.
- Brome** : Sedative for the nervous system (in case of insomnia).
- Calcium** : Constitutes and maintains bones, teeth, tendons, cellular nucleus and genetic material, equilibrate blood and hormonal functions. Its fixation and integration in bones and tissue is dependent on the presence of phosphorus, vitamin D and C, florid, magnesium, and cupper and siliceous.
- Cobalt** : Regulator of??Vagosympathique and vasodilatation?? systems. This is a component of vitamin B12 and is an anti-anemic in combination with iron and vitamin B12. Necessary for the fixation of iron in the hemoglobin.
- Copper** : Necessary for cellular life and exchanges in the cellular system and iron fixation in the bones. Have anti-degenerative, anti-infectious, anti-viral and anti-inflammatory properties.
- Florid** : Plays an important role in metabolism of calcium in the bones, tendons and teeth. It also plays a role against osteoporosis, rachitic and in fractures consolidation. Efficient against teeth??Carries?
- Gold** : Anti-infectious and anti-inflammatory.
- Iodine** : Anti-sclerosis, vascular protector, especially for big vessels, hypo tensor, antitoxic, depurative, indispensable for the thyroid gland good action.
- Lithium** : Psychic equilibrator, efficient against insomnia, melancholy, anxiety, obsessions, depressions and hysteria.

- Magnesium** : Growth factor, tonic, cellular regeneration factor, vagosympathic?? System and psychic equilibrator, hepatic drainer, anti-septic, calcium regulator, anti-sclerosis agent.
- Manganese** : Important gland regulator, especially for growth. Active in the metabolism of sugar, lipids and proteins. Improves hepatic and kidney functions. Accelerate the combustion. Aids minerals fixation (calcium, iron, vitamins).
- Nickel** : Stimulate pancreas functions, highly useful for diabetics.
- Phosphorus** : In combination with lipids, sugar, protids, plays an important role in vitamin D and calcium metabolism. It also plays an important role in the function of the thyroid and protein metabolism. It is an essential element of the nervous energy and sexuality.
- Potassium** : Muscular and cardiac tonic. It intervenes in the kidney and ??Surrénales glands?? Regulation. Plays a role in living tissues water equilibrium.
- Siliceous** : Plays an important role in bones, vascular, nervous and respiratory functions. Intervenes in the nails, skin, and tendons constitution. Re-mineralization agent.
- Silver** : Bactericide, indicated in case of infection.
- Sodium** : Hormonal medium alcalanisation agent.
- Sulfur** : Necessary for the bones, teeth, nail, hair, tendons and ??Articulations? Depurative and anti-infectious in the ??Hépatobiliaires?? troubles.
- Zinc** : Intervenes in the blood corpuscles formation. Stimulator and regulator of the hypophys and genital glands. Plays a role in the pancreas functions. Frequently associated with the vitamin metabolism and functions.

Vitamins

- A** : ??Antixérophtalmique (lip soluble)?? = growth vitamin and rejuvenating factor, nourishes and softens the skin and the mucous, cicatrizing agent and enhance the visual acuity.
- B1** : Thiamine (hydro soluble) = important role in the nervous equilibrium, Anti-nevritic
- B2** : riboflavin (hydro soluble) = action on sugar, protids, lipids metabolism. Important for the skin and the mucous.
- B3** : Nicotinic amid or vitamin PP (hydro soluble) = important in the cellular nutrition, sugar and lipids metabolism.
- B5** : Pantothenic acid (hydro soluble) = cells, epithelium and especially hepatic cells protector. Anti-infection properties, efficient against hair fall for women.
- B6** : Pyridoxine (hydro soluble) = muscular stimulator, skin protector. Plays an important role in growth. Plays an important role in the metabolism of lipids and amino acids. Useful for hemoglobin formation.
- B8** : Biotin or vitamin H (hydro soluble) = plays a role in the glucocide, protids and lipids metabolism. Protector of skin and mucous.
- B9** : Folic acid (hydro soluble) = anti-anemic factor, plays an important role the amino acids metabolism.
- B12** : Cyanocoblamine (Hydro soluble) or hydroxocoblamine = the strongest anti-anemic factor, plays an important role in lipids, glucids, amino acids metabolism and nervous system. Also important for general metabolism stimulation.
- C** : Ascorbic acid (hydro soluble) = strong action in oxydoreductin cellular exchanges. Anti-infectious and tonic. Contribute in toxins destruction and the utilization of iron and in Surrénales glands.
- C2** : Vitamin P (hydrosoluble) = capillary resistance factor and important for the vessels permeability diminution. Synergetic with vitamin C. Intervenes in the hemorrhia phenomena and vessels and

arteries.

- D** : Anti-rachitic (lipo-soluble) = important action for the bones, teeth formation and calcium assimilation.
- E** : Tocopherol (lipo-soluble) = reproduction vitamin. Intervenes in the lipids metabolism. Plays an important role against puberty retardation, sterility, frigidity, sexual impotency. Efficient against menopause troubles and menstruation pains.
- F** : Non saturated fatty acid (liposoluble) = necessary for the organic equilibrium, lipid metabolism and synthetisation. The co-vitamins necessary for the vitamin F, B6 and E vitamins. Plays an important role in the cholesterol metabolism, on health and skin beauty. Favor freshness, glamour and the velvety skin appearance.
- K** : Anti-hemorrhagic lipo-soluble transformed in the liver into prothrombine. Necessary against all hemorrhagies, hepatitic troubles and ??colitiques??. Helps to support anti-biotic treatment.
